electricity  
storage

### **We offer:**

Elestor offers a positive, international working environment with many opportunities to improve your skills. We offer competitive terms of employment and an exciting atmosphere.

### **About Elestor**

Elestor develops a revolutionary low-cost flow battery, thereby reducing the costs for storing electricity to an absolute minimum. To realize this low cost materials are used, as well as a smart system design.

Since 2015, several storage systems have been operational in the Elestor laboratories in Arnhem, the Netherlands. Also the first test & evaluation systems are operational in the field.
