

Are you looking for an exciting job, full of challenges? And would you like to work for one of the most innovative companies in The Netherlands? Elestor has a job opportunity for a:

Business Process Manager

As Business Process Manager, you play an important role in defining, introducing and managing efficient administrative procedures and systems, not only on a managerial level but explicitly also hands-on.

This is a new position in a successful and fast growing company, which gives the pro-active candidate the space to shape and lead this activity.

Responsibilities

- Development of administrative processes and systems to support the internal business structures, while producing the required management and project information on a monthly basis.
- Carry out project administration, including periodical cost and hour reports
- Development and implementation of a new hour registration system
- Development of systematics for depreciation of assets including monthly allocation to the various projects
- Inventory management
- Development and support of procurement systematics
- The development of administrative procedures towards 'Integrale Kost Systematiek', as handled by RVO for subsidy projects
- Enter / change of data
- Coaching of the internal organization in order to establish administrative systems and procedures

We ask

- A background and education in business administration or information management (BSc)
- Experience with definition and implementation of administrative systems for asset, inventory and procurement
- 5 years experience in a similar role, or this vacancy is a logical career step
- Fluent in written and spoken English
- Excellent analytical skills
- Familiar with databases, data-modeling and Lean Data Management
- Strong communication skills
- Entrepreneurial mind set

- Pro-active, hands-on mentality
- Experience in a technical environment is a plus

We offer

Elestor offers a positive working environment with many opportunities to practice as well as to develop your skills. We offer competitive employment terms and a professional and exciting atmosphere in a company which can play a decisive role in realizing the energy transition towards a 100% clean electricity supply.

About Elestor

Elestor has developed a revolutionary and award-winning flow battery, reducing the costs for storing electricity to an absolute minimum.

Since 2015, several systems have been operational in the Elestor laboratories in Arnhem, the Netherlands, and test & evaluation systems have been operational in the field during past years. A fast growing and enthusiastic team is working hard on maturing this technology in anticipation of the launch of larger storage systems in 2020.
